# Clematis for 2021

**Group 1 – No prune.** These Clematis only flower on the prior year's growth, and are some of the earliest bloomers. Trim right after the first flowering period of the season, but only to remove growth above a broken or damaged stem or to maintain a smaller, tidier plant.

‘Blue Light’

Z. 4-8

Group 1 (no prune) 4-5" double  
Violet-blue flowers. Blooms June-July,  
7' tall. Limited availability.

**Group 2 – Pruning is moderate or optional.** Even though some cultivars can flower on new growth, these Clematis usually produce the largest flowers on older vines from prior years. In spring, prune to remove ends that are damaged or showing no signs of new growth. Use caution to retain stems from last season for best flowering.
